### 1.3. Bài tập trắc nghiệm Unit 11: Reading

Read the passage below and decide whether the statements are TRUE or FALSE?

Good morning, I'm Alex. And today I will talk about recycling. Recycling has a lot of advantages. Firstly, it saves the environment. Instead of cutting more trees to produce paper, we can use recycled papers. Secondly, recycling also saves energy. Thirdly, recycling helps reducing global warming and reduce pollution. Finally, recycling helps saving money. Recycled articles cost less than new ones. In conclusion, using recycled product is environmentally-friendly and money-saving. Therefore, we should put plastic bottles in recycling bins and buy recycled products.

**Question 1:** Recycling has a lot of benefits.

A. True

B. False

**Question 2:** The first reason is recycling preserves the environment.

A. True

B. False

D. fifthly

**Question 10:**

A. pollutes

B. pollutions

C. pollutants

D. polluting

Choose the letter A, B, C or D to answer these following questions

Glass is a wonderful substance. It can be recycled over and over again. The good thing about glass recycling is that the glass retains its quality. Imagine how many bottles of soda, juice and glass jars are used daily. If we simply throw them away, the environment will suffer greatly. There are many advantages of glass recycling. The first thing is that glass recycling reduces industrial pollution. Reducing industrial pollution benefits not only the environment but also the entire ecosystem. Another benefit is the recycling of glass conserves natural resources. Recycling glass saves on the need to obtain more materials to make new glass; therefore, they save existing natural resources.

**Question 11:** Can glass be recycled many times?

A. Yes, it can

B. Yes, it will

C. No, it can't

D. No, it won't

**Question 12:** What is the good point of glass recycling?

A. The glass retains its quality

B. The glass breaks

- C. The glass disappears
- D. The glass reduced its quality
