4. If we protect our environment, we (have)..... an ideal place to live.
5. He (learn)..... English since he was ten years old.

III. Read the passage and answer the questions.

Thomas A. Edison was born in Milan, Ohio, on February 11th, 1847. His family moved to Port Huron, Michigan, when he was seven years old. Surprisingly, he attended school for only two months. His mother, a former teacher, taught him a few things, but Thomas was mostly self-educated. His natural curiosity led him to start experimenting at a young age.

Thomas Alve Edison lit up the world with his invention of the electric light. Although the electric light seems to be the most useful, it was not his only invention. He also invented the record player, the motion picture camera, and over 1,200 other things. About every two weeks he created something new.

He worked 16 out of every 24 hours. Sometimes he worked so intensely that his wife had reminded him to sleep and eat.

Thomas Edison died at the age of 84 on October 18th, 1931, at his estate in West Orange, New Jersey. He left numerous inventions that improved the quality of life all over the world.

1. When and where was Edison born?
2. How did Thomas Edison light up the world?
3. How often did Edison create something new?
4. How old was Edison when he died?

III. Choose the word or phrase in the box that best fits the blank space in the following passage.

save	luxuries	in	lighting	last
labeling	consumers	reduced	effectively	efficiency

In Western countries, electricity, gas, and water are not (1) but necessities. Companies now realize that (2) want products that will not only work (3), but also save money.

For most North American households, (4) accounts for 10 percent to 15 percent of the electricity bill. However, this amount can be (5) by replacing an ordinary 100- watt light bulb with an energy saving bulb. These bulbs use a quarter of the electricity of standard bulbs and (6) eight times longer. Therefore consumers can (7) about US7toUS7toUS21 per bulb. In Europe, there is a (8) scheme for refrigerators, freezers, washing machines and tumble dryers. The label tells the consumers how much energy (9) each model has, compared with other appliances (10) the same category.
