Today, millions of people want to learn or improve their English but it is difficult to find the best method. Is it better to study in Britain or America or to study in your own country?

The advantages of going to Britain seem obvious. Firstly, you will be able to listen to the language all the time. You will be surrounded completely by the language wherever you go. Another advantage is that you have to speak the language if you are with other people. At home, it is always possible to speak Vietnamese if you want to and the learning is slower.

On the other hand, there are also advantages to staying at home to study. You don't have to make

big changes to your life. As well as this, it is also a lot cheaper than going to Britain but it is never possible to achieve the results of living in the UK. If you have a good teacher, I think you can learn in a more concentrated way than being in Britain without going to a school.

So, in conclusion, I think that if you have enough time and enough money, the best choice is to spend some time in the UK. This is simply not possible for most people, so being at home is the only **viable** option. The most important thing to do in this situation is to maximise your opportunities: to speak only English in class and to try to use English whenever possible outside the class.

33. What is probably the topic of the passage?

- A. There are no Vietnamese people in Britain.
- B. There are very good teachers of English there.
- C. You will have to speak English and not your language.
- D. The language schools in the UK are always better.

35. What is one of the advantages of staying at home to learn English?

- A. The teachers aren't very good in Britain.
- B. You have to work too hard to make money in Britain.
- C. You can concentrate on learning English only.
- D. Your life can continue more or less as it was before.
